

TOMBSTONE EPITAPH.

Tombstone, Cochise County, Arizona.

ENTERED IN THE POST OFFICE AS SECOND-CLASS MATTER.

From Friday's Daily.

The T. M. & M. Co. paid its tax today, amounting to upward of \$1,400.

The pay car was at Fairbank yesterday and made the railroad boys happy.

C. H. Bassett has filed an exemption notice on the Lyman mine, Tombstone district.

Horace Harrison and Miss Laura Stewart were married in Tucson yesterday.

Mrs. W. K. Meade is again in Tucson after an absence in Los Angeles of several weeks.

B. Riggs slaughtered twenty-eight head of cattle during the months of October and November.

W. H. Stilwell came in today from Tucson, where he has been attending the sitting of the land court.

Henry Hart, a highly respected cattle man of Apache county, has been arrested on a charge of killing the sheriff of one of Texas' counties twelve years ago.

A San Francisco dispatch says the Southern Pacific company has closed the sale of 50,000 acres of land in San Diego county to the Colorado River Irrigation Co. The price paid was \$2,500,000.

The report contained in the Enterprise that Booth and Winnie King were married on Dec. 5th is far from the truth. No such event has occurred or is contemplated.

H. Schmieding has opened at his jewelry store on Allen street one of the most striking displays of Christmas goods in the city at prices in accord with the times. His place will be open evenings as well as all day until after the holidays.

Phenix is gaining notoriety. B. P. Burgess, treasurer for the Warner grocery, is missing with the funds of the company, estimated roughly at \$2,000. Burgess came from Portland, Or., a year ago with a young woman who left Phenix with him. The pair is supposed to have gone to Guaymas.

The Albuquerque Times says of two well known Arizonians:

Ex-Gov. N. O. Murphy of Arizona and C. W. Leach, prominent in mining circles in our sister territory, came up from the south last evening en route from Phenix to Prescott. The gentlemen were taken in charge by Walter C. Hadley, and were his guests last evening at the Commercial club. They will leave for the west this morning.

Messrs. Collier and Kemple, two mining men from Ivanhoe, near Silver City, N. M., came in today and left on the outgoing stage. These gentlemen own a mine at Ivanhoe, formerly owned by J. H. McGruder. They had worked it profitably until ten days since when their smelting plant was destroyed by fire. They came here to inspect the San Diego smelting plant owned by J. P. McAllister. It is probable that the sale will be closed by telegraph, and the machinery moved before January 1st.

The Nogales Fraud.

In Tucson yesterday the land court held that the Nogales grant was a grant by quantity, and not a purchase from the Mexican government, and that 7 1/2 square leagues were paid for and granted and no more; that taking the initial point, the Santa Cruz monument, on the north line of the Casita rancho in Mexico, the full amount fell south of the international boundary line and that there was no part of said land in the United States and that consequently claimants had no cause of action against the United States for any lands lying north of the international boundary line.

The attorneys for the claimants gave notice that they would appeal the case to the United States supreme court.

The news was received with unbounded enthusiasm everywhere. From Nogales came the following dispatch to the Prospector:

News of the decision of the land court in favor of Nogales is being celebrated by the citizens in a very enthusiastic manner. Firing cannon, band of music and other demonstrations of joy.

FOR MEN OF SCIENCE.

DEEP-SEA soundings in the interest of science and commerce were begun in 1895.

The mean annual temperature at the Arctic regions is below thirty degrees Fahrenheit.

The sun throws vertical rays on the earth's surface only upon an area equal to about thirty-five square miles at any one time.

HEPPARCHION, 100 years B. C., counted 1,012 stars with the naked eye and Holmhus 1,022. The telescope now counts 100,000,000.

A WELL-KNOWN geologist has computed the earth's age on the basis of experiments made on the effect of heat and pressure on certain rocks. He concludes that the earth's age as a planet is 24,000,000 years.

OLEO oil is made from the choicest fat of beef cattle, chilled in ice water, then melted at a temperature of 140 degrees Fahrenheit. From this is pressed a perfect soluble oil, known as oleo oil, which is the only beef product used in oleomargarine.

It is asserted that since the earthquake in South Carolina the soil in Berkeley county has been more productive than ever before. Prof. Newman, of Clemson college, accounts for this on the theory that the earthquake provided better drainage than previously existed.

TREES AND FRUIT.

DANIEL HARBOLE, of Berks county, Pa., has a peach tree on his premises which has borne good fruit for seventy years.

An apple tree in Clinton county, Mo., was bearing fruit and blossoms at the same time a week ago, and up in Catskill, New York, a horse chestnut tree was in full bloom for the second time this summer.

The bread fruit tree seen in the Dutch East Indies grows forty to fifty feet high. The fruit is round or slightly oval in shape, first green, then brown, then turning yellow when fully ripe.

A PEAR tree in Fulton street in Hempstead, L. I., has ripe pears and blossoms on it, and an apple tree on the same grounds is also now in blossom. A horse chestnut tree in Myrtle avenue, Brooklyn, in front of Washington park, now has its second crop of blossoms this season.

An apple tree known to be one hundred and forty-three years old, on the property of Mrs. Delia Hotchkiss, in Cheshire, Conn., was destroyed by a recent storm. It bore fruit every fall, but only on one side each year. The side that bore one year would be barren the next. The tree yielded about one hundred and forty bushels annually.

MEANINGS OF TITLES.

SULTAN, or in its older form, soldan was first adopted by Bajazet. The older title of the chief Mohammedan ruler was caliph, commander of the Faithful.

The Greek emperors of Constantinople called themselves "Holy," and one of the official titles by which they insisted on being addressed was: "Your Holiness."

COUNT dates from the later Roman empire. Before the evacuation of Britain by the Romans a count of the Saxon shore was appointed to prevent Saxon invasions.

AMONG the titles of the Roman emperors were Augustus, Caesar, Divus, Pius, Felix, Clemens, Tranquillus, Sanctissimus, Altissimus, Dominus and others of similar ponderosity.

The title of Illustrious was never formally bestowed as a title of honor until the time of Constantine, and was then given to such princes as had distinguished themselves in war.

The quæstor was a Roman official found in two or more departments. In one he fulfilled the duties of a public prosecutor, in the other he had charge of the public revenues.

RAILROAD RATTLE.

A LOCOMOTIVE requires fuel and labor to the value of three thousand dollars in the course of a year.

The railways of England and Scotland derive a larger revenue from their goods than from their passenger traffic.

In every mile of railroad there is seven feet and four inches that is not covered by the rails—the space left between them for expansion.

The Victoria railway bridge over the St. Lawrence, at Montreal, Can., contains 3,000,000 cubic feet of masonry work and 10,500 tons of iron.

MOSQUITOES were unknown in Atlanta, Ga., before sleeping cars were run from Savannah into that city. This is evidence that mosquitoes travel first-class.

The little toe is said to be disappearing from the human foot.

A PHILADELPHIA medical paper says that city noises produce disease.

The value of Canada's fisheries yield last year is announced as \$13,941,171.

In Blackstone's time 150 offenses were punishable in England by death.

It is usually considered that an adult should drink about three pints of liquid a day.

The prince of Wales has seventeen brothers-in-law, sixteen uncles, sixty seven cousins and fifty-seven nephews and nieces.

The second son of the archbishop of Canterbury has achieved considerable success with a novel entitled "Dodo," dealing with fashionable society.

THE GROOM (very wealthy)—"Why did you marry an ordinary chap like me?" The BRIDE—"I haven't the slightest idea; mamma managed the whole affair."—Life's Calendar.

OH! NO!

Just received at 4:30 p. m. the following dispatch:

Arizona admission bill passed the house by one hundred and twenty-five majority.

The Druggists

In Lowell, Mass., agree in saying that they sell more of Hood's Sarsaparilla than all other blood purifiers.

F. C. GOODALE: I sell more of Hood's Sarsaparilla than all other blood purifiers.

A. W. DAVIS & CO.: Hood's takes the lead of all other sarsaparillas.

C. F. BLANCHARD: We sell more of Hood's Sarsaparilla than of any similar.

MANNING & SHAW: With us the sale of Hood's is 2 to 1 of any other kind.

F. & E. BAILEY & CO.: Hood's sarsaparilla is one of the best medicines.

CARLTON & HOBBS: Hood's Sarsaparilla is one of the best medicines we have. Its sale increases every year.

P. M. MOODY: We sell twice as much of Hood's sarsaparilla as of anything similar.

C. A. SWAN: Hood's is the most popular sarsaparilla of the day.

THIRTY OTHER druggists speak similarly. This popularity at home, where Hood's Sarsaparilla and its proprietors have been known for many years, could not continue if the medicine did not possess merit. And these facts should certainly convince people in other sections of the country that Hood's Sarsaparilla is a good, reliable medicine.

Hood's Sarsaparilla

Sold by druggists. Price six for \$5. Prepared only by C. L. HOOD & CO., Apothecaries, Lowell, Mass.
